PROFESSIONAL SUMMARY

AI-First Senior iOS Engineer / Senior iOS Developer with 7+ years of experience across AI, fintech, media, and telecom, including roles at FGS Global, Tele2, and Revolut. Experienced in **end-to-end development**, from architecture and implementation to testing and releases, with additional **full-stack engineering** experience in backend development and UI/UX design. Integrating **AI-assisted workflows** throughout the development process to speed up delivery and raise engineering quality. Mentored junior iOS engineers and founded a coding school with 100+ students.

WORK EXPERIENCE

FGS Global - AI-First Senior iOS Engineer Mar 2025 - Present

- Built and shipped an enterprise **voice-first AI application** for employees across 13 countries as the **sole iOS engineer**, owning architecture, implementation, and integrations while delivering the **MVP in one month**
- Accelerated **feature development by ~40%** by building **AI-assisted** workflows for development, debugging, and code review with Claude Code, AI agents, and MCP integrations, with human-in-the-loop approvals
- Engineered a real-time, low-latency **LLM voice pipeline** combining server-generated TTS via ElevenLabs, streaming LLM responses over SSE, and on-device STT that eliminated third-party transcription costs, saving **~$11K annually**
- Expanded into full-stack work, designing UI/UX in Figma and building **30+ endpoints** with Next.js that connect the iOS app to backend and AI services, collaborating with cross-functional teams

Technologies: Swift, SwiftUI, MVVM, AVFoundation, Speech Framework, SSE, Next.js, LLM, Claude Code, MCP

Tele2 - Senior iOS Developer Feb 2023 - Mar 2025

- Reduced duplicated **UI code by ~35%** by architecting a multi-brand design system with 32 reusable components shared across 2 telecom apps
- Led the migration from Swift 5 to **Swift 6 strict concurrency** (async/await, actors), transitioned from XCTest to Swift Testing, and increased test coverage from **41.7% to 78.1%**
- Developed a Ringtones media module with catalog browsing and instant preview, supporting 7K+ activations a month
- Delivered a Call Recording media module, enabling users to review recorded conversations through synchronized audio playback and interactive transcript navigation, supporting 9K+ recording playbacks per month

Technologies: Swift, UIKit, SwiftUI, MVP-C, AVFoundation, SPM, Swift Testing, Fastlane, GitLab CI, Firebase, Amplitude

Revolut - iOS Engineer Mar 2021 - Feb 2023

- Launched Instant Card Transfers for a banking app, letting users initiate a card transfer in under a minute and reaching **50K+ transfers a month**
- Reduced **repeat transfer time by ~40%** with one-tap repeat with pre-filled payment details in transaction history
- Improved P2P and bank transfer flows with clearer recipient selection, simpler confirmation, and earlier input validation

Technologies: Swift, UIKit, MVVM, Flow Coordinator, Core Data, Feature Flags, XCTest, Fastlane, CI/CD

Appunite - iOS Developer Jan 2019 - Mar 2021

- Built and launched a **crypto exchange app from scratch in 4 months** as the sole iOS developer, implementing user registration, identity verification (KYC), and real-time price updates via WebSockets
- Delivered a meeting management module for an **enterprise SaaS** platform, with recurring meetings and high-performance custom Google Calendar-style timeline views

Technologies: Swift, Objective-C, UIKit, MVC, MVVM, Combine, RxSwift, WebSockets, Core Data, CocoaPods, XCTest

SKILLS

iOS / Mobile: Swift, SwiftUI, UIKit, Xcode, Swift Concurrency (Swift 6, async/await, actors), Combine, Swift Package Manager (SPM), Core Data, AVFoundation, Speech Framework, Apple Pay (PassKit), Keychain, RxSwift, Objective-C

Architecture, Networking & Testing: MVVM, MVP, Clean Architecture, Design Systems, REST APIs (URLSession), WebSockets, SSE, OAuth 2.0, OIDC, Okta, Unit Testing (XCTest, Swift Testing)

AI, Backend & DevOps: LLM, AI agents, MCP, Claude Code (sub-agents, skills, hooks), STT, TTS, Next.js, TypeScript, Git, CI/CD, Fastlane, TestFlight, App Store Connect, Firebase (Crashlytics, Analytics)

EDUCATION

Suleyman Demirel University: Master's Degree in Computer Science, Bachelor's Degree in Information Systems

LANGUAGES

English: C1 (Advanced) | **Turkish:** C1 (Advanced) | **Kazakh:** Native | **Russian:** C1 (Advanced)
